## Aims and Scope

*NURSING OPEN* is a peer reviewed open access journal that welcomes articles on all aspects of nursing and midwifery practice, research, education and policy. We aim to publish articles that contribute to the art and science of nursing and which have a positive impact on health either locally, nationally, regionally or globally. As such the following qualities are essential in any article published by the journal: scientific credibility and rigour, and coherence and clarity in the writing. Contributions do not need to be novel as confirmatory and replication studies will be considered, however the article must present new findings, which could include the reporting of negative findings.

*NURSING OPEN* is a Wiley Open Access journal, one of a new series of peer-reviewed titles publishing quality research with speed and efficiency. For further information visit the Wiley Open Access website at <http://www.wileyopenaccess.com>.

## Open Access and Copyright

All articles published by *Nursing Open* are fully open access: immediately freely available to read, download and share under the terms of the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited, and allows the commercial use of published articles. Copyright on any research article in a journal published by *Nursing Open* is retained by the author(s).
